

1. The “digital clock” code currently outputs time to stdout, once per second, in the format **HH:MM:SS**. Using the **GLUT_STROKE_MONO_ROMAN** font, modify the code so it displays the current time in a GLUT window like this:

Do not change the window size (100 x 75), the viewport (full window), or the world coordinates to viewport mapping (left = bottom = 0.0, right = top = 1.0) ... you will have to figure out how to scale and translate the text.
